### **EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with David Bilodeau on 11/04/03.

The following changes to the drawings have been approved by the examiner and agreed upon by applicant: On sheet 13, there are presently two different figures captioned 14(C) and two different figures captioned 14(G). The second figure captioned 14(C) shall be re-captioned 14(D), and the second figure captioned 14(G) shall be re-captioned 14(H). In order to avoid abandonment of the application, applicant must make these above agreed upon drawing changes.

### **REASONS FOR ALLOWANCE**

2. The following is an examiner's statement of reasons for allowance:

Claims 1, 10, and 11 recite features similar to those found in Krivokapic et al. 6,100,558 and Katoh et al. 6,087,687. However, the cumulative effect of amendments filed 02/19/2003 and 09/17/2003 is that each of these claims now requires, *inter alia*, that a length of a bottom part of the gate electrode parallel to a channel length direction

Art Unit: 2826

be longer than a length of an upper part of the gate insulation film along a channel length direction. In Krivokapic et al., the bottom part of the gate electrode is longer than a length of an upper part of the gate insulation film only by virtue of the fact that portions of the bottom part of the gate electrode are angled with respect to the channel length direction, so as to double as side parts. The flat bottom portion of the gate electrode in Krivokapic et al. (the part that is truly parallel to a channel length direction) is exactly the same length as the length of an upper part of the gate insulation film. In Katoh et al. a bottom part of the gate electrode is longer than a length of an upper part of the gate insulation film, but it is longer in a direction that is at right angles to the channel length direction, because in the claims, the channel length direction points from the source to the drain, as is explained on page 5 of applicant's remarks filed 2/19/03.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
